

CERTIFICATE

BALINIT A TiN
BALINIT C WC/C
BALINIT D CrN

Compositional information on above mentioned BALINIT PVD coatings was provided by Balzers AG, FL - 9496 Balzers / Fürstentum Liechtenstein.

The coatings are considered as ceramic materials and have been evaluated accordingly ¹⁾. Analytical investigations as the determination of the migration of certain elements as well as the determination of the overall migration were performed.

Based on our investigations we can confirm, that

BALINIT A TiN / BALINIT D CrN / BALINIT C WC/C

under technically acceptable conditions do not release elements into food at concentrations which may endanger human health, and may therefore be used in contact with food in the following countries of the

European Union (EU)

Belgium / Denmark / France / Germany / Greece / Republic of Ireland / Italy /
Luxembourg / The Netherland / Portugal / Spain / United Kingdom

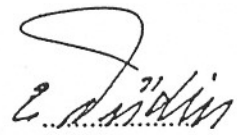

and the

European Free Trade Association (EFTA)

Austria / Finland / Norway / Sweden / Switzerland
